

## Large Disc Capacity

Bravo II can burn and print up to 25 discs in standard mode or up to 50 discs in "Kiosk Mode" where discs are dispensed out the center of the machine. For duplication of 50 discs at a time, a Kiosk Kit (shown at right) is available to stack discs neatly and ready for distribution.

## Bravo II is Networkable

PTBurn™ Network Software is a new, low-cost software package for Primera's Bravo II Disc Publisher that adds network capability for your disc burning and printing jobs.

Up to five users may send CD or DVD recording and print jobs to Bravo II remotely from client PCs. Additional five-user license blocks are available for connecting as many client PCs as desired. The software runs on virtually any server/client network under Windows® 2000 or XP Professional.

A Software Developer's Kit (SDK) is also available. The SDK allows custom applications to control Bravo II's robotic, burn and print functions. Typical SDK applications include kiosks, medical imaging, photo processing, data archival, banking/financial and much more.

The Bravo II Disc Publisher is designed to publish (copy and print) discs for audio, music, software, video, data storage and much more. Here are just a few applications:

- Music Artists
- Videographers
- Production Houses
- Independent Filmmakers
- High Schools, Colleges and Universities
- Marketing/Advertising/PR Departments and Agencies
- Software Companies
- Radio Stations
- Worship Centers
- Television Stations
- Medical Imaging Facilities/Hospitals
- Photographers
- Government Agencies

# Professional “All-in-One” CD/DVD Publishing On Your Desktop!

Bravo II combines fast, automated robotic CD/DVD duplication along with full-color, 4800 dpi direct-to-disc printing – all in one compact, desktop unit.

Bravo II is ideal for producing either one at a time, unique discs or jobs of up to 50 identical discs at a time. Models are available for both Windows®-based PCs and Mac® computers.

## Burn and Print – Automatically!

Bravo II is the easiest to use and most advanced CD/DVD publishing system ever. With its built-in burn and print capabilities, it produces up to 50 discs at a time. Best of all, the entire process is automatic. Simply specify the files you wish to burn and print, select how many discs you'd like, and press “Go!” from your Windows PC or Mac.

## CD, CD/DVD and Print-Only Models

For CD-Rs, the Bravo II CD Publisher has a high-speed 52x CD-R recorder. Full 700MB discs are produced in less than three minutes each.

For DVD±Rs, choose the Bravo II DVD Publisher. This model is dual-purpose. It produces both CD-Rs as well as DVD±Rs in the same drive. Bravo II incorporates the very latest, state-of-the-art recordable DVD drives from Plextor®.

If you only need to print, the Bravo II AutoPrinter produces gorgeous, full-color CDs and DVDs in jobs of up to 50 discs at a time. It automatically feeds discs into and out of the printer and is the perfect companion to the tower-style duplicator you may already own – all for a price that's about the same as other manual disc printers!

## Integrated 4800 DPI Printing

Bravo II incorporates stunning, full-color printing at up to 4800 dpi – the best in the industry. You'll be able to produce discs that look as professional as any you've ever seen using high-resolution text, graphics and even photos. Printing times are fast. It took just 54 seconds to print the disc shown here at 600 x 600 dpi resolution.

## Exclusive AccuDisc™ Technology

With Bravo II, you'll also benefit from Primera's new patent-pending AccuDisc Technology.

This suite of hardware and firmware enhancements provides the most accurate and precise disc picking available today. Utilizing advanced LED optics instead of mechanical components, AccuDisc eliminates misalignment of the pick mechanism. It also prevents the feeding of double discs into the recordable drive – a common problem with other picking systems.

## Many Choices of Media

Bravo II produces not only standard 120mm discs, but also several of the popular business card shaped and mini CD/DVD formats. An optional media adapter kit is required.

## Get Up and Running Quickly

From initial set-up to full operation, Bravo II is easy to use. The professional burning software from Sonic® for the PC or Charismatic Engineering's Discribe V5.0 for the Mac allows virtually any digital information to be duplicated. SureThing™ CD Labeler Primera Edition Software for the PC and Discus™ Labeling Software for the Mac is also included. Both programs make professional looking disc printing a snap with full-color backgrounds and templates.

## The Price/Performance Leader

Primera manufactures more automated disc publishing and duplication systems than any other company in the world. So, no matter what you need to duplicate – audio, video, music, software, photos, images, presentations and more – you can feel confident with the Bravo II's performance and reliability. Best of all, Bravo II delivers truly professional results at an affordable price!
